# Agenda

- Introduction
- Microsoft 365 Backup
- Microsoft 365 Archive
- Licensing
- Discussions and Q&A

# What is Microsoft 365 Backup?

- Backup all or select SharePoint sites, OneDrive accounts, and Exchange mailboxes in your tenant
- Restore files, sites, and mailbox items in your tenant in parallel to a prior point-in-time in a granular manner or at massive scale
- Search or filter content in your backups using key metadata such as item or site names, owners, or event types within specific restore point date ranges
- Microsoft 365 Backup directly in the Microsoft 365 admin center
- New Backup APIs for 3<sup>rd</sup> party vendors
